Age Range: 1 - 4 years

Grade Level: Preschool and up

Customer Reviews

Thought this book would be like our other baby signs book, that has one sign for each page. Has a lot of words per page, which isn't what I was looking for and makes it harder for my 18 month old to pick up what each sign is.

Has a few signs that are incorrect but overall a good first learning tool

This book is awesome! My two year old is hearing impaired and I ordered most of the books in this series. I am impressed with the the way the author and illustrators have put this book together. It is the easiest book I have found to teach not only myself and my daughter sign, but also for my other school aged children to learn as well. I highly reccommend this book for anyone who wishes to learn sign.

These are great!! I bought them thinking there would only be one or two signs per page but there

are tons, at least 4 per page. The back has a kind of index with hand shapes to help aid in learning the sign. The pictures are cute with lots of diversity, which I love!!

Great resource for learning to sign with your little one. Also works well for them to point at what they need using the books illustrations. Book is well made and pages are durable.

This books has several cartoons of signing on each page. They are not quite large enough or interesting enough to keep my son’s attention. They are not quite clear enough to be useful for parents trying to learn sign language.

I have several books in this series. We love the artwork, clarity of images/instructions and variety of useful signs. Just wish there was a table of contents or index for easy reference, but the books are short enough that it’s not a major hindrance.

Granddaughter loves these books for her son to read.
