Synopsis

This comprehensive 2nd edition covers the key issues that relate human behavior to traffic safety. In particular it covers the increasing roles that pedestrians and cyclists have in the traffic system; the role of infotainment in driver distraction; and the increasing role of driver assistance systems in changing the driver-vehicle interaction.

Book Information

Hardcover: 1264 pages

Publisher: Emerald Group Publishing; 2nd edition edition (June 22, 2017)

Language: English

ISBN-10: 1786352222

ISBN-13: 978-1786352224

Product Dimensions: 7 x 0.9 x 10 inches

Shipping Weight: 5.9 pounds (View shipping rates and policies)

Customer Reviews

The first edition of this book was published in 2007. This second edition highlights findings from the use of naturalistic driving studies and the technique of meta-analysis. This edition presents the latest research on driving safety, road users behavior, and changing cultural norms that emphasize sustainability. There is new material on bicyclists and motorcyclists and new info on autonomous vehicles. Other new areas explored are in-vehicle driver assistance systems and the latest research on human limitations and capabilities related to driving. Part A provides background on methods, models, and theories of driver behavior, and Part B looks at driver capacities and individual differences in visual attention in young drivers, new drivers, and older drivers. Later sections cover driving style, temporary impairment, and vulnerable road users (such as pedestrians). The final section deals with causes of crashes and countermeasures. The book contains b&w photos, diagrams, and summary charts. --Annotation Ã Â©2017 Ringgold Inc. Portland, OR (protoview.com)
