Customer Reviews

gently used with a slightly worn cover. updated version. I used it for my recent CPR class.

I thought this "Student Workbook" would be just like the regular textbook but with added practice problems, but that is not the case. The book has no text content at all, just practice such as crossword puzzles, fill in the blank, and multiple choice. I’m sure the book is great for testing your knowledge, but don’t make the same mistake I did and think that this book will have pages filled with text and information.

This is book has the 2010 American Heart Association guidelines that is required for Healthcare Provider training. Note: The guidelines change every 5 years. The new books with the 2015 guidelines should be available in early 2016. It takes the AHA about a year to make the books available & start teaching the new guidelines once the guidelines are announced.

I bought this book for my BLS class I took last month, the book itself is very informative and is great to look back on, however while in the 4 hour class we were never asked to open it.... So in the long run it really wasn’t nessasary that I purchased it.

worked perfect for my class

Hard to write anything. Bought it for BLS review class and we never even opened it up. I'm sure all the info is great, just resent being told to buy a book that we didn't use, and it was then changed, so couldn't resell. Not the books fault though!

Exactly the book I needed for my BLS class! A good reference to keep around as well!

Needed for CPR class, liked the lay out and instruction.

A must have for your family safety....
