Customer Reviews

As a Facility Management Consultant, we are often asked to get involved in Access Control Systems, particularly in the development of system installations, maintenance and operations over the system's full life cycle.What I particularly like about this book is that the author has managed to create a perfect balance of Technical Insight with Simplified Language for those of us that have some M&E knowledge, but not enough in this specialist field. Well done to the author. I'll be keeping a copy of this at my side at all times.Conor CooneyFM ConsultantArup
