Expertly researched and created in partnership with the U.S. Forest Service and others, the map covers the wilderness and the surrounding parts of the Mt. While the area's rugged, glacier-carved terrain is dominated by tens of peaks and hundreds of lakes, other key points of interest include Skykomish and Wenatchee River, Lake Eaton State Park and Stevens Pass. All trails are clearly marked and color coded according to their designated usage, whether youÃ¢â ¬â„¢re traveling by foot, horse, mountain bike, or motorized vehicle. The Pacific Crest and Pacific Northwest Trails, which snake through the area, are highlighted. For those who prefer exploring in a motorized vehicle the Mountains to Sound and Stevens Pass Greenways are both indicated, as well as OHV routes and high clearance roads. The map base includes contour lines and elevations for peaks, summits, passes and the hundreds of lakes. Valuable wilderness regulation and safety tips are also included on the map, along with useful contact information. Many recreation and adventure features are noted as well, including campgrounds and primitive campsites, horse camps and corrals, downhill and cross-country ski areas, snowmobile trails, boat launches and fishing areas.Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking.Today, National Geographic Maps continues this mission by creating the world’s best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.

This map is amazing. very detailed and very easy to read, amazingly durable as well. i give it three stars because they are missing a MAJORRRRR feature on this map that i think is massively important. there are no mileage segments on the trails to tell you how many miles are in between segments. You will go on your hikes not knowing the exact distance. The scale can’t always be perfectly accurate. The other Nat Geo area maps ive gotten of washington DO have them so i dont see why they couldnt add that. VERY disappointed

The map gives me what I wanted regarding trails and geographic features. The only thing that keeps me from giving it a full 5 stars is that when it arrived (with other maps), it was folded-over inside a plastic overwrap that creased the map. I’m picky about keeping my maps pretty pristine, so I found this less than satisfactory. (Actually, the other maps in my order were in perfect condition in the package--only this one was mildly mangled.)Otherwise, it’s the same very high quality I’ve come to expect with the Trails Illustrated Maps--an excellent quality that has been maintained after acquisition by National Geographic.I’d highly recommend this map if you’re traveling to this area and have an interest in the topography and back-country travel.

Great map for those who want to leave the blacktop and venture away from civilization for a while. We keep this map in the car at all times just in case we get lost in the maze that can be the Mt Baker-Snoqualmie NF.

I try and buy these map every time I'm going on a trip. They are water resistant and almost always have up to date info. They are much better than USGS quad maps for covering larger areas. However, they lack the detail of the 1:24,000 quads. So, either or but quads are not waterproof.

Nicely printed with good details.

Great map of the area, and high quality map! I wish it showed more area.

All the maps in this series are terrific! Wouldn't dream of heading out without one!

Great map, useful for exploring the area. I have several of these maps for different regions, and use them often for backpacking trips. Great quality and very easy to read.
