I love this book! My little one is one month old now but we started using it with her a few weeks ago. It’s great because it’s so easy to set up by a blanket for tummy time. She’s totally engaged looking at it and I like how it is long enough to make an entire arc around her head, so wherever she looks

she has something to focus on. It's also great that it's two sided (one side is black with white pictures and the other side is white with black pictures) because if it seems like she's bored we just turn it around!

I just got this and my baby already loves it. It is very sturdy. I set it up in his crib and he looked at it for a long while, talking to it. The contrasting colors are wonderful. I should note that the book does not have any words, but that doesn't matter to me because we can make our own stories!! Yay imagination! I love how it unfolds or stays folded depending on how you want to use it. Wonderful for little ones!

I was told that the black and white books by Tana Hoban were good. And, after purchasing Black & White, I agree.In this book, eight pictures are shown in white with a black background. There's a baby bottle, a balloon, a chair, buttons, a bird, a flower, a banana and a sailboat. The book folds out, making it great for tummy time, and the objects shown are simple ones that a baby is sure to see (in color) around him. On the opposite side of the above pictures, when folded out, six more are shown in black with a white background. There's a fork and spoon, a baby bib, a butterfly, a leaf, keys and a cat.I own three black and white books. And, while I thinkÃ Â Baby Animals Black and White: Black and WhiteÃ Â by Phyllis Limbacher Tildes is the best, I'm glad I bought Hoban's Black & White.

This was sort of an impulse buy for my newborn after seeing a friend who had one, but I must say my 2 month old loves tummy time much more when I set this book out in front of her! She will stare at the pictures and coo until her neck gets tired, rather than getting bored like before.

I got this as a gift for my granddaughter and she loves it. It's her favorite book to look at. She especially likes the butterfly picture. My daughter actually bought this same book for a friend's baby shower.

Highly recommend this book for newborns! I got this book for my son when he was one month old. He loved looking at all the pictures. Even now that he is 3 months old he still enjoys looking at this book!

One of my baby favorite books. He loves it. Perfect for tummy time. The material is strong enough

and the designed of the book is beautiful!

I started showing this book to my son since he was one week old. He is 4 weeks now and it is a part of our play gym time every day. He actually focuses on the pictures for some time and pays more attention to the book the rattles. Book is well made and pictures are nice.
