I was always fascinated with history of ancient civilizations to which we owe a lot, from mathematics to arts, law, astronomy, etc. This book offers tons of very interesting information about civilazations such as: Ancient Egypt, Ancient Rome, The Aztecs, Carthage and Ancient Persia, to name a few. I enjoyed every page of this book, and now I admire those civilazations even more. Reading this piece of work was like a travel back to ancient times.

Excellent look in to the diversity of past popular nations in history that have made a mark on modern society and how we live today. From the Ancient Egyptians, the Aztecs, Chinese, Japanese, the Romans... The author gives a brief detailed overview of the culture, beliefs, government system, military, their celebrities, technological inventions, and more. He sums all civilizations up very well, in this entertaining educational read.

When I was in high school, I had this world history subject relating to this book. This book refreshed my memory about ancient civilizations. It gained me more knowledge and information. The book

was direct to its point and the reader can easily understand the topics.

I am an advocate lover of history. The information in this book is fun, educational, and exciting. I have always been drawn to the history of the Egyptian civilization and there way of life. This book has educated me in so many ways about there heritage it makes me want to go to a museum. For example from reading this book i have learned that around five thousand years ago, a series of independent city states thriving along the banks of the River Nile came together and were finally ruled under one leader known as the Pharaoh. I was never aware of this! If you want to learn more about ancient civilizations i suggest you buy this book. Thank you and god bless.

Ancient Civilization always amazed me when I studied in school or when I visited the ruins of some of them. It was very interesting to read about a bunch of them again like the Romans or the Aztecs. It always amazed me how could they have such an amazing architecture or how they could create cities that big.
