Respected teacher, widely published author, and consultant to organizations in the areas of training and supervisory development. He is Professor Emeritus of Management in the Management Studies Department of the Labovitz School of Business and Economics at the University of Minnesota Duluth (UMD).

The book is very dry and the publisher limits reading the book on kindles with text to speech. I got the book to read on my kindle for class instead I have to read on a computer screen. The material is repetitive, dry, and mentions many other disciplines but never answers the what is the point question or why this is beneficial. It feels like an "Intro to Corporate American 101" textbook, not an advanced interdisciplinary guide.

I read the first two chapters of this book and it was very engaging. However I then found out I had ordered the wrong one.Also, rentals are awesome. My boyfriend and I have been using them so awhile now and the books are always in great shape and so easy to return.

I found this book extremely boring. I had to have it for one of my graduate classes and it is just so...blah. Just blue words on white paper. Not a lot of illustrations or anything to break up the monotony. The "stories" at the beginning of each chapter are so ridiculously corny. This book is completely overpriced!

I used this textbook for a graduate course I took and I loved the format because it helps the student to apply the concepts in real life situations in the workplace-regardless of where you work or the work environment.

This book helped get me through grad school. The print is small and the writer assumes that the reader has excellent comprehension.

I had to buy as a text book but I would not have read if it was not for a class. Very basic.

They rebound the book,hard cover. Item was exactly as described. A++++ seller.

This book was extremely helpful to my studies
