Customer Reviews

I liked the puzzles. I purchased both volumes and I think the puzzles in the second are more challenging. In each puzzle the playing cards are spread around in rows and columns. You have to remove pairs of the same type of cards. But you can only remove the cards that are at the bottom of the columns. One thing that I found confusing, was that I had to click on the links at the bottom of the cards instead of clicking on the cards directly. Once I understood how it should work I got used to it.I definitely recommend it. It’s an interesting idea to have a puzzle game on Kindle.

I don’t usually play games, but sometimes I enjoy a puzzle or a brain teaser. I didn’t know that I could actually get a puzzle on my Kindle. I saw a co-worker play, so I tried it and bought it for myself. Once you get used to the controls, it’s a pretty good set of card puzzles.

I bought this because I enjoy playing games on my kindle sometimes, but this game was kind of dull. I didn’t think it was much of a challenge. In addition, it was a little hard to see on my 6 inch K2, but maybe it would be better on a Kindle DX. I didn’t have any problems navigating like some other reviewers, but just didn’t find the game very fun. I would love to see some other solitaire games for the Kindle - traditional solitaire, free cell, spider solitaire.

I wish kindle had more active apps. This game isn’t too bad but I was expecting somthing active. As it is this is nothing like the solitar you play on your computer. You see all your cards but you only choose from the lowest cards in the sever rows. meaning in a row of 392014 you can only use 4. When you make your chose it takes you to another page. There are MILLIONS of pages so you have to use the links provided. Its an ok game and cheap so if you are going on a trip or get left waiting I recomend it especially if you just want a little something in-between reading.

The playing area is placed so high up, whenever I try to click on a card in the top row it opens the top menu area.

This game is one of the worst. I’ve played this game with cards and enjoyed it. The game did not down load correctly, every time I tried to down load it again it still would not down load right. Need to update the game or correct the down load of it.

I turned on the game and my kindle froze. I closed the cover to turn it off. Then I could not get any response from the kindle. Swiping to unlock didn’t work at all. I had to restart the kindle by holding down the power button for 20 seconds.

Have not tried it
