Synopsis

Billions of dollars are spent every year on research into targeted therapies for cancer. ThatÃ¢â ¬â„¢s why itÃ¢â ¬â„¢s more than ever crucial for the thousands of scientists working in the field to keep right up to date with the cutting edge. This fascinating collection of material goes a long way to helping them do so, featuring as it does contributions to a crucial international meeting in Italy. The meeting provided a forum for scientists and clinicians working in cancer drug discovery and therapy to share their opinions and experiences. The text here offers readers an overview of diverse approaches, ranging from drug discovery to cellular therapy. Overall, the book addresses the key question of whether ultimately targeted therapy in cancer will be a myth or a reality.

Book Information

Series: Advances in Experimental Medicine and Biology (Book 610)

Hardcover: 191 pages

Publisher: Springer; 2008 edition (December 10, 2007)

Language: English

ISBN-10: 0387738975

ISBN-13: 978-0387738970

Product Dimensions: 6.1 x 0.5 x 9.2 inches

Shipping Weight: 14.9 ounces (View shipping rates and policies)
