## Customer Reviews

I never buy anything unnecessary for my classes, it just creates unneeded clutter and stress for me. This book, however, takes the stress out of writing lab reports. It’s on the pricey side, but it pays for itself. Even when I get stuck on writing a part of a report, I go back to this book and I find what I was doing wrong and/or how to go on. You can go through the different sections in the book to find something or you can refer to its very handy index at the back.Jan Pechenik even gives examples for every part of your report (e.g., she lets you see what an introduction looks like, what a bibliography looks like, etc.). This book is for the neophytes, giving them the basics and also for the professional scientist, telling them how to format their papers for peer-reviewed scientific journals.Ever since I’ve had this (I have the 5th edition, but I lost it, so I’m going to order this 6th edition...can’t live without it!), it’s really hard to get a bad grade on a lab report. I used to have problems with writing captions for my tables and figures, but now they actually are articulate without having my rambling tone embedded in there.

I was very happy with this book, its informative and helpful if you are taking biology in college

For me this book was only ok. The price was great! The shipping was fast. I would recommend this book to anyone for me it just wasn't my cup of tea.

Pechnik has numerous examples (showing both acceptable and unacceptable practices) for every topic discussed, and tells you step-by-step how to do just about everything. Very useful, even beyond the classroom.

I am really getting a lot of useful information from this book. I needed help and this one did the trick. thaks

Book was a little bit late, like two days late, but when I received it, I received exactly what I expected to get. Thanks!

This book was really help for my class. I recommend it to anyone planning to do bio lab reports. Believe me its not easy, but with this book its makes it that much better.

thank you for the fast deleviery sorry that it has taken me so long to send feed back
