Synopsis

This second volume in the series features the anemones and soft corals associated with reefs, detailing their biology and husbandry requirements, and featuring numerous species descriptions, with the benefit of wonderful color photographs. Also featured is new information regarding parasites in reef aquariums, and captive culture of anemones and soft corals. The book finishes with another section featuring more stunning images of reef aquariums around the world.

Customer Reviews

Although the book is a little dated/has been around a while, the content is for the most part very current. Tons of information and scientific explanations, and a bit more scientific terminology than some might appreciate. Personally, I liked having the scientific reference. Written like a text book on reefing.

The Reef Aquarium Series by Sprung and Delbeek are Text Books for Hobbyists. Compared to the other widely available non collegiate books on this and similar subjects this series stands well above its peers. The breadth of the information covered is astounding and its all been written in an approachable style thats perfect for anyone who wishes to learn.

Hi,The Best book of Marine invertebrates. The chapter about Anemones is very good and detailed. Although this book has been written in 1997 it’s very current. Sometimes you will find references to

volume 1 of the series and if you don’t have Vol 1 some things can be more difficult to understand.Nowadays, the pictures could be best but this is not a problem for this excellent book.I strongly recommend.

This is a text book like you would use in classroom, very good but dry.

Excellent book

Good

This is a great book on anemones, zoanthids, mushroom polyps, and soft corals, with lots of practical help on care and troubleshooting. The text and layout are very clean and easy to follow.Unlike Nilsen and Fossa, this is a book you can read through and enjoy, then read over and over again. It may not contain as much information as Nilsen and Fossa, but it is much more accessible.

good reading but out of date .
