Synopsis

The world’s leading reference in hematopathology returns with this completely updated second edition. Authored by international experts in the field, it covers a broad range of hematologic disorders -- both benign and malignant -- with information on the pathogenesis, clinical and pathologic diagnosis, and treatment for each. Comprehensive in scope, it’s a must-have resource for both residents and practicing pathologists alike.Authored by the chief architects of the WHO classification in neoplasms of hematopoietic and lymphoid tissue.Covers the newest diagnostic techniques, including molecular, immunohistochemical, and genetic studies.Confirm or challenge your diagnostic interpretations by comparing specimens to over 1,000 high-quality color images.Boasts detailed, practical advice from world leaders in hematopathology.Places an emphasis on pathologic diagnoses, including molecular and genetic testing.Updated with the most current WHO classifications of hematologic disease, including lymphoma and leukemia and peripheral T-cell lymphomas.Covers hot topics in hematopathology, such as the latest genetic insights into lymphoma and leukemia; the new nomenclature for myelodysplastic syndromes; new developments on the subject of Grey zone lymphoma; and much more.Expert Consult eBook version included with purchase. This enhanced eBook experience allows you to search all of the text, figures, images, and references from the book on a variety of devices. There’s also a downloadable image bank, and Virtual Microscope Slides are featured in several chapters.Give your clinicians the best guidance with this comprehensive reference in hematopathology.

Customer Reviews

"This is such as a wonerful text. If you had to choose only one haematopathology book to support your specialist practice, this would be it. All references have been listed only with the online version of the book (Expert Consult - no extra cost) and these are linked to Pub Med...This book is a must for haematologists, haematologists and haemato-oncologists. Has it fulfilled it's objective of 'an up-to-date and comprehensive text on hematopathology?' Yes. Should you buy it? Yes." ACP News, April 2012

Daniel A. Arber, MD AUTHOR --This text refers to an out of print or unavailable edition of this title.

I love this book. I'm a hematopathologist and I feel like it is basically an extended edition of the WHO, it is as comprehensive as the WHO but with much more detail and differentia diagnosis, I love it!!! Would highly recommend!!

excellent updated hematopathology textbook.

A comprehensive source for the state of the art Ivanka hematopathology. The e edition is very smart and invaluable

The book brings the 4 th WHO review.

It is extremely well organized with great pictures. A must have next to the WHO book. Easily the best book I've bought in the last few years.

Up to Date is Enough for me.The Pictures are very good mainly in my Tablet PC.I recommend it to every resident and staff pathologist.

This is a great book. Nice text and images. It is the #2 heme textbook on my shelf after the WHO blue book.

its big but overwhelming. usually just use the WHO book. plus my practice partner (hemepath) did not recommend it at all.
