Customer Reviews

Explore the world through accurate and up-to-date mapping.

It was a beautiful format. Although it gave us a sense of direction, it really didn’t help on our travels across the country. Streets are not named properly in the country roads. We basically threw it away.

Yes I use a GPS. But this map gave me a over view of a large area along with points of interest. A friend traveling with me learned to read a map for the first time on this trip and started the day with ideas of how to get to where we planned to go that day using various different routes. We went many places we would have not gone just following a GPS.

This map will do a good job for you in navigating around Ireland. Even if you have a GPS unit, it is worthwhile to check your route on an actual map. I wound up in the middle of the countryside following my GPS to where it said Waterford was. The road atlas showed me where I needed to go.

Really good!! Very accurate. We drove all around northern Ireland and Northern Ireland, without a problem. It was so helpful! We had planned out all the sites to see before we entered the country, and we found them all without a problem. Many of the sites were already marked on the map, while others we only saw because this atlas pointed them out. I would recommend this item.

Came in very very useful in circling Ireland. Definitely benefitted us on a two week trip.

like teh pictures but then we didn't get to go and compare it with reality

Very helpful

I will use these maps in June 2013. However, already I am disappointed that it does not contain a useful map of Dublin --only the downtown area. Otherwise, I expect the book will be useful for a self-drive trip around the countryside.
