Customer Reviews

From Nature Study Guild’s Finders series of pocket guides.

Naturalist May Theilgaard Watts was the first staff naturalist at the Morton Arboretum, near Chicago, Illinois, where she developed an innovative education program. She introduced her students and readers to natural history and the science of ecology through her lectures, classes, newspaper columns, and her books Reading the Landscape of America and Reading the Landscape of Europe, as well as several field guides.

This guide is perfect for basic flower id. The one con I have found is that the plant must actually have the flower on it in order to id it. This can be troublesome if you are trying to key out a plant in the forest that is past bloom or pre-bloom.

It’s a small book, good for carrying with you on hikes. It’s very informative. It has helped me a lot, on

my ventures. With Articulate descriptionsOn what to look for. I really have enjoyed this book.

Well laid out and very complete. Easy to use and concise.Unfortunately i didn't notice that it was for eastern US, and i'm on the west coast, but there's still a great deal of cross coverage so i've managed to make use of it anyhow. I will be buying the pacific coast version of this book as soon as i find it.

Another gem by May Watts. Not as good as the tree finder, but still the best out there.

Great to carry on walks or hikes nice and small

Great little reference book

I'm very pleased with this book. The plants are organized by family, which is an excellent way to learn about plants.

Item just as described.
