Synopsis

The Time Warp Trio is staying home for once, and Joe’s got a perfect way to keep The Book from getting lost. But when the guys find themselves stuck on top of the half-finished Brooklyn Bridge, they realize that Joe’s foolproof Book Tracker wasn’t so foolproof after all. Now the guys have to make their way through 1877 Brooklyn and find The Book before they un-invent the lightbulb, the phonograph and&150oh, no!&150baseball!

Book Information

Grade Level: 2 - 4

Customer Reviews

Joe, Fred, and Sam, the Time Warp Trio, should know better by now than to mess around with The Book--a magical book given to Joe by his uncle. But this time they really think they have things under control... until Sam’s latest invention, the Graphi-Sonic, accidentally interfaces with The Book, and the boys wind up traveling back in time to 1877. At least they recognize the turf--it’s still their hometown of Brooklyn, minus the cars and skyscrapers. And plus one very addled Thomas Edison. Not to mention the trio’s great-granddaughters from the future, who have (still with us?) inherited The Book. Now, all they have to do is find The Book (which is missing again) and skedaddle back to the future before the phonograph and light bulb and Edison’s other inventions lose their chance of

being invented. The many fans of Jon Scieszka's Time Warp Trio sequence (2095, etc.) will be thrilled to delve into another illogical, madcap, even slightly educational adventure with the hapless time-traveling lads. (Ages 7 to 11) --Emilie Coulter --This text refers to an out of print or unavailable edition of this title.

Grades 3-5--This adventure finds the boys in New York City, perched on top of a Brooklyn Bridge tower. At first they believe that they have traveled into the future (complete with space aliens), mainly because they encounter their great-granddaughters once again. They discover, however, that they are visiting Brooklyn before the bridge was completed. In fact, it is 1877. "The Book" and Sam's invention, "a Graphic Sonic," have somehow combined to propel them into the past, leaving them in the precarious situation of trying to get back to their own time. They also meet a "zapped" Thomas Edison, who may or may not become a great inventor. How the trio, their great-granddaughters, and baseball set everything aright makes for a fun read. Another winning entry in the series.Kay Bowes, Concord Pike Library, Wilmington, DECopyright 2002 Cahners Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

Great book for ages 7-9

my son really likes the time warp trio books, we have many of them & all are great fun to read!

I like the part when Thomas Edison keeps repeating, "So what and be quiet you weanie". I also enjoyed the book because it was very adventurous...
