ISBN-13: 978-0739015575

Product Dimensions: 1 x 4.2 x 5.2 inches

Shipping Weight: 8 ounces (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 586 customer reviews

Best Sellers Rank: #1,287 in Books (See Top 100 in Books) #2 inÃ Â Books > Arts & Photography > Music > Theory, Composition & Performance > Theory #8 inÃ Â Books > Arts & Photography > Music > Instruments > Piano

Customer Reviews

Great for starters. It is not a complete set of everything but is great for teaching music and drilling yourself on your knowledge. The cards a good quality and also include numbers on the back so you don’t have to worry about them getting out of order (I know not everyone cares about that but for those who do there you go.) I bought these to help teach music and found them to be very helpful especially since they include time signatures, dynamic markings, key signatures, and staffs. Like I said it’s definitely not all encompassing but is great for beginners.

The cards are nice and cover all the basics. The paper could be thicker and more durable. And there’s no box. Why no box? Why just a rubber band? I’m forced to use a ziploc like some sort of animal. It’s 2017, people! Flash cards come in boxes!

Not what I was expecting, but for the inexpensive price I can make them work with a little effort in my part. Very thin, paper like weight, so not very durable. If you know this going into it and are willing to put in some time to use this as a tool for teaching instead of a finished project, it’s a great deal. For the money, you couldn’t make all of this and print it out. Just be prepared to use it as a piece of a teaching system.

The cards are a little slick and hard to handle, but they are very useful for learning musical notation. The notes go from two octaves below to two octaves above middle C, so if you're an advanced player or someone who plays an instrument significantly above or below middle C, it won't cover all your needs. Also, if you play an instrument that uses an alternative clef (e.g. Alto), that isn't covered, either.

These are good quality and have more information than I expected. We are using these for my 8 year old son in his piano practice. His teacher says they should help with sight reading. I am pleased with the quality and speed of service.

These flash cards are very helpful when learning to read music. I took piano lessons as a child and am now taking refresher lessons as an adult. These cards could be even more helpful if they included the major and minor chords, which is important when learning to play piano or guitar.

We have several flash cards not music but alphabets and math.When compared to these this flash card is so thin and large it is VERY difficult to handle.I usually hold 1 card at a time so I can read the answers on the back while showing it to my kidsbut you can't do that with these because the answer see's through and you can read the answers!But then you have to hold the whole deck or at least a few at a time but these things are big and flimsy thatchanging the cards doesn't go smoothly.I would recommend getting something else.

Great for travel or make a game out of learning musical notes. My daughter's teacher recommended it when she couldn't remember the notes. We used them on the plane, and I gave her a reward when she gets 10 correct answers in a row. I wish there is a pouch for them so I can keep them together. 2 rubber bands did the trick, though.
