Synopsis

Take a journey back in time to a land filled with dinosaurs- and don’t leave without this full-color, information-packed guide to the dinosaurs’ world. The field guide section provides a species-by-species portrait of individual dinosaurs and the sites in which they were found. Also includes practical advice about where to see and find dinosaur remains.

Customer Reviews

What’s a dinosaur watcher to do? Where do you go to find creatures that have been dead for 65 million years, and how do you know them when you see them? If you’re a bird watcher, you get a field guide to the birds. Now dinosaur watchers can get their own field guide, a just-bigger-than-pocket-size encyclopedia of dinosaur science. The text is clear, objective, up-to-date, and dense with information, containing sections on every aspect of dinosaur discovery and biology. The heart of Dinosaurs is the guide. Each page in this section has an artist’s portrait of an interesting dinosaur, tells how its name is pronounced and what it means, tells where and when it lived, and describes the animal’s discovery and lifestyle. Most helpfully, it also lists museums where the fossils can be seen, and it does not confine itself to North America: London, Paris, Cape Town, Beijing, Melbourne, and Ulan Bator get noticed, too. The book also has descriptions of some of the world’s major dinosaur museums and field sites. Even if you can’t make it to the Flaming Cliffs of Mongolia this year, you can learn why it might be worth the trip. --Mary Ellen Curtin

Time-Life presents an informative field guide and natural history of dinosaurs that neither oversimplifies its subject nor sacrifices pictorial splendor. DINOSAURS is a comprehensive volume, featuring the best of both scientific fact and colorful lore. From the first discovery of fossils to our current understanding of dinosaur biology and behavior, this book gives a wide audience access to the latest in research. Divided by era, a variety of prehistoric creatures is depicted in both captivating image and thoughtful text Chapters include Reading the Past, The World in the Age of Dinosaurs, Meet the Dinosaurs, Our Relationship With Dinosaurs, Dinosaur Sites, and a Resource Directory. *Dinosaur field guide, with more than 75 species showcased *List of recommended sites and museums to visit, organized geographically *Introduction written by expert in field

I am a special education teacher I highly recommend this book it’s a great book with great pictures in great condition...thank you

Half of this book is about famous paleontologists, what dinosaurs are, and how they became extinct. The next half has at least 80 pictures and paintings of different species of dinosaurs, and a description of their characteristics and how they live. I would especially recommend it to 11 and 12 year olds who know their dinosaurs. WARNING: This is not a little kid’s book. It does contain A LOT of information. It has at least a page on each species of dinosaur, but I think it should go into even more detail on these amazing animals.
