Customer Reviews

"IÃ¢â ¬â„¢ve seen lots of activity books for kids, but few are so all-encompassing."Ã Â —LiveFreeLearnFree.comÃ Â "A rare gift."Ã Â —Deepfun.comÃ Â "Great for teachers, and also fun for families."Ã Â —Ashland Daily TidingsÃ Â "Helps group leaders effortlessly guide a team through fun activities."Ã Â —Family MagazineÃ Â "Great activities that can be done with as few as two people."Ã Â —Lansing State Journal

We use these activities for our 4th thru 8th grade F.I.R.S.T. Robotics program to help teach Core Values and Teamwork to the students. Very happy with the activities we've gotten from the book.

This book is a must-have for anyone needing to coordinate large group team building activities! I was able to use many pages of this book for my middle school students and they loved the activities!

This volume arrived in New condition, as described, and is full of awesome group activities that will get any number of people (of any age) working together! I love the advice given in the introduction

for using the activities - this is a fantastic resource!

This book is full of great activities from simple (getting to know each other, story telling, etc.) to complex (construction and engineering, etc.) that can take as little as 5 minutes or as long as an hour or more--I teach 7th grade, and use these activities to build team work with my advisory. All of my students have LOVED every activity I've used so far, and I intend to do several more over the course of the year.

Our school is using this book with children from aged 6 to aged 10, they love the challenges which are easy to do and it is well set out to understand how the communication, creativity and cooperation can work in team situation. Not expensive and worthwhile.

I use this book a lot for teambuilding activities for middle schoolers. I like the ideas and often tailor them to fit my budget or my needs. Some of the ideas are a bit repetitive and have a lot of the same ideas, but I still find it very useful. My kids have enjoyed the games that I get out of it!

Nice book!

Have not used it myself, but bought it for my daughter in law who works with children with Autism. Not my field, but from what I saw and imagined, I think it will be very useful in her work.
