Synopsis

Human Parasitology emphasizes the medical aspects of the topic, while incorporating functional morphology, physiology, biochemistry, and immunology to enhance appreciation of the diverse implications of parasitism. Bridging the gap between classical clinical parasitology texts and traditional encyclopaedic treatises, Human Parasitology appeals to students interested not only in the medical aspects of Parasitology but also to those who require a solid foundation in the biology of parasites. *Updated and expanded reference section*New chapter on Immunology*Additional SEM and TEM micrographs*Professionally drawn life cycle illustrations*Addition of Ã¢â ¬Å“Host Immune Response” section for each organism

Customer Reviews

"There are few textbooks for students studying medical parasitology. This up-to-date third edition is easier to read than many, making it a viable option for upper-level students."-Martha Gentry-Nielsen, PhD, Creighton University School of Medicine"There are few textbooks for students stuyding medical parasitology. This up-to-date third edition is easier to read than many, making it a viable option for upper-level students."-Martha Gentry-Nielsen, PhD, Creighton University School of Medicine

This revised and updated edition provides succinct coverage of the organisms that parasitize humans.

this book helped me get an A in my parasitology class! is a great book and very easy to read. unfortunately, there aren't many pictures that are in color. but, regardless, i would highly recommend this book for anyone taking parasitology!

great price for a used textbook!

Have studied it in first level of medicine, and later Bought it, cqn be a good book, things related to parasites are well-explained..

Book was fine, got the job done and got and A.

It was in great shape and really useful for class! It was a great reference material and came in handy.

As listed, great timing!

Good read.

For this subject, one of the best textbooks available. Not for the casual reader, but almost required reading if you wish to immerse yourself in the subject. Upper-level college student material or grad student worthy.
