Age Range: 8 - 12 years

Grade Level: 3 - 7

Customer Reviews

This large-format book might not tell everything about money, as the title implies, but provides a great many facts related to the subject. Although each double-page spread offers a particular topic and browsers can jump back and forth without regard to page numbers, the information is loosely organized into four chapters: one on the concept and history of money; another on the making, spending, and saving of it; one called The Power of Money; and, finally, Fun with Money. The latter introduces money myths, the concept of exchange rates, and a project which involves turning a dollar bill into an origami butterfly. Often combining a number of small-print text boxes and

illustrations on a page with several brightly colored backgrounds, the crowded layouts can be visually distracting. Even so, kids drawn to the excellent photos, dynamic presentation, and grab-bag approach to information may enjoy the book. Recommended as a supplement to more traditional presentations on money. Grades 4-6. --Carolyn Phelan

"Learn about the history of money, what it looks like in different countries, how itÃ¢â ¬â„¢s made and other fun facts in this colorful book." --Washington Post KidsPost"Kids drawn to the excellent photos, dynamic presentation, and grab-bag approach to information may enjoy this book." --Booklist"This is a great addition to any elementary collection because of its scope, content, and quality of information." --Library Media Connection

My kids love this book. They enjoy all of the National Geographic fact books but this one is especially helpful for me. My kids are really interested in foreign currency for some reason and I can’t answer any of their questions so this book promotes their researching answers to their own questions. Money well spent. Hee Hee.

Although I purchased this book on money for my grandson, I found it to be very interesting and full of facts that an adult could also enjoy.

This book has a lot less details than we thought it would. Lots of pictures, a few facts. Likely great for younger children, not enough information for 5th grade and up.

Great Book - lots of information and very good pictures!

My currency collecting son loves this book. It has a great layout and is full of facts that he is passing on to me. An easy read with tons of information.

Very informative! National Geographic does a fantastic job with nonfiction text. Chock full of information. Great pictures. Easy for elementary school aged children to read.

Purchased for my grandson! He loves the book! Very well written and definitely holds his interest (no pun intended)!

Easy for kids to read !
