Customer Reviews

Ariana Killoran creates illustrations for books, magazines, films and her daughterÃ¢â ¬â„¢s lunchbox. With scientists at 23andme, she has developed educational videos about genetics and human prehistory, as well as the board book You Share Genes With Me published in 2013. The One and Only Me is her first book for elementary school children with 23andme. Ariana lives on the coast of Maine with her husband and two daughters.23andMe Inc. is a company that helps people understand what their genes can tell them about themselves. more than one million people have started learning about their unique genes from 23andme. We have scientists studying the different ways genes play a role in ancestry (where we come from), traits (why we might look like we do) and health (sometimes diseases are caused by our genes). Researchers are constantly searching for

clues in our genes to help prevent people from getting sick. If you want to learn more you can visit our website: 23andme.com.

A fantastic introduction to genes for little ones. My 6 yo son quickly caught on to the concept of autosomal recessive inheritance by informing me that he got the "not brown" and "not brown" genes for eye color. What a great way to introduce little ones to the exciting world of medical genetics! Both my 6 yo and 8 yo were very interested!

Just as described, thank you!ÃƒÂ Ã Å¸Ã ËœÃ Å
