Synopsis

DK brings John Deere’s reputation for quality to this book series, along with eye-popping photos of their signature green and yellow tractors. Young readers learn about tractors, farming, as well as the world around them with incredible photographs, simple text, and a little help from Johnny Tractor. Preschoolers can touch "chunky" tractor tires, "spiky" grass, "bumpy" seeds, and much more. Each spread features a different texture and clear instruction that encourages young children to explore, and use their eyes and hands to recognize and name objects.

Book Information

Age Range: 2 and up

Series: Touch & Feel

Board book: 12 pages

Publisher: DK CHILDREN; Brdbk edition (January 21, 2008)

Customer Reviews

My 2 1/2 year old twins have recently become interested in tractors so I bought this book so they could learn more about them. The book is nice because it has just a couple sentences and something for kids to feel on each page. The textures don’t feel real accurate but my kids enjoy touching them regardless. The book is also the perfect size for toddlers to hold in their small hands and it will easily slip into a diaper bag or good-size purse if you are out and about. I think it’s a good book for kids who are interested in tractors and it gives them a basic idea of what the objects feel like. I would recommend this good board book for anyone who has a toddler who likes tractors or for any John Deere fan!

My almost 3 year old son loves tractors with all his heart. I don’t share his passion so for me this book is boring as all get out but to him it is pure magic. We have a sizeable book collection of mom-approved stories and child-approved fact books. This one is his very favorite. He will go from family member to family member to get us all to read this over and over. If your child loves tractors it’s a must have.

I probably should have read the description better, but this book is not that great. It’s only like 5 pages (been a while since I have read it). The sensory part is disappointing. It seems like they picked the cheapest materials they could find for the "touch and feel parts" as they feel not even close to what they should. My son liked it for a few days before he moved onto better tractor books.

It’s a nice idea, but seemed to put all the work into the photos on the page.The book contains little tiny patches of "feely" stuff.Nothing about this book will spark a child’s senses.Maybe if they would have put larger areas that where textured throughout the pages that a child could actually rub his hand along.Plus three pages barely have any texture to feel at all .Whats "touch and Feel" about smooth shiny foil that they used on 2 pages out of the 6 pages in the book . Waste of good child spending money.

I’m very surprised at all the glowing reviews because this book is very thin & flimsy, not to mention that it’s really more appropriate for a much younger child. My son (22 months old) looked through it excitedly twice then got bored. It’s got 4 pages, not including covers, so to me it’s just not worth it. The "Tractor Steering Wheel Play-a-Sound Book" would be a much better buy if your little one is a fan of tractors like mine is.

thanks

My Two-year old grandson loves this book and "reads" it before playing with his little tractor toy. Contrary to other reviews, he hasn’t torn out the feely things, although he likes to tear paper books. One reviewer said it was too short, apparently not for my grandson. After all, how long is a two-year olds attention span? - about 1 second, so the 4-5 board pages are fine.

I purchased this book for my 1 year old son. Although it is cute, it really is not that interesting of a book. The feel part of the book is really lame, as most of the feel parts are the same, smooth. Some

are shiny but still boring. We have a few of the other Touch and Feel books and have enjoyed the other touch and feel as there is a greater variety to the feeling areas.
