Synopsis

Stedman’s Medical Terminology Flash Cards, Second Edition contains 800 flash cards made up of prefixes, suffixes, and root words to help users learn the building blocks of medical terminology. Each form is presented on the front of the card, and the definition and word building samples appear on the back. This edition features a new full-color design with specialties color-coded and illustrations added to cards. Any student of medical terminology, or any student in nursing, health professions or medicine will value this quick, easy format for assessing their medical terminology knowledge. A companion website includes an audio pronunciation glossary and a question bank, including multiple choice, fill-in-the-blank, spelling bee, matching exercises, figure labeling, and medical records based questions.

Customer Reviews

-- The students that purchased like the format and the easy reading. It makes studying faster and easier. -- The contents are gathered in a easy study method and I feel you did a very good job in putting these together. -- The material on the flashcards is very good.

These flash cards were very helpful in studying for my Medical Term test. I would recommend these to anyone.

Organized very well, easy to read, and color coded. Highly recommend this set for anyone that has to take a medical terminology class. Comes in a solid case to store away for future reference.

My medical terminology class is way more advanced than these cards. I'm going to try to resell them since I live in a college town, but honestly, I've been writing out my own flash cards, these have stayed in the box.

I bought this product to study for a state exam. There isn't anything in here you won't learn. You can set up the cards as you wish.

Very informative and useful in learning medical terminology. Arrived quickly and just like new.

Just what I was looking for

Yes, extremely well used. Delivery right on time!

I dislike studying, but these are pretty neat. Cards are crisp and came in numerical order. Only issue is that some of the examples are not accurate.
