Customer Reviews

My husband, the card-playing geologist, wants to have the actual scientific name or formula for the rock shown. Personally I really like the pretty pictures, and I do learn from them, too.

I bought this for a friend's daughter since she loves all mineral rocks. The cards are very colorful and the size is just right. I wish the material is a little more thick and shiny. They can be used as playing cards which I like. Also, they're very educational.

Fun cards for the rock nerd in your life :)

I bought this as a gift for my daughter-in-law as a fun side gift. It should be fun for her as a geology major and educational for my grandson, too.

My hubby loved this deck of cards. He is a rock collector so of coarse he'd love this as a gift. The deck is not flimsy and the pics are nice and bright.

The students love playing with these in class - after everything else is completed of course.

This item was purchased as a Christmas gift for a young friend. I was very pleased with it, as I'm sure she will be.

My grandchildren 5 and 8 love these cards. They invented games to play with them and tried to match rocks they'd found to possibly identify them. I didn't find them flimsy as another review said.
