Wow this people are very committed with their lectors.I bought this book for my mom, she is a License Nutritionist in Puerto Rico and she was talking about the Register all my life. So I do my research and found this company with so many good reviews. The book is very easy to read, and explains concepts very good. Also the have a contact email, and respond very quickly.I also buy Flash cards, and exam practice test, for only $150. For me is great, because i am a medical graduate, on my way to get my boards, and all our books are 150 and up, each one! And I ve been practicing the biochemistry and nutrition for my USMLE with her, and the flash cards are great.On first page of this book, Autor toll you, to do practice questions, read, and review. Trust me, this are all the things you need to do. Study with a positive actitud, practice practice practice practice questions!!!, review questions and understand concepts.You can found what else i buy so you can revise, and see is worth for you. its a good tool to refresh and study. Only thing is that things change so much, and so there are some information that needs updating.

I like how it briefly explains all subjects that might be on the test. I also like the secrets in the back and I really like the practice exam with all the answers and explanations.

I just started studying from this book and it seems that the information in it is down to the point and important, relevant information is provided.

A nice addition to Inman and all the other resources. Wish it had an index to help you better look for information you need to review.

The book is very helpful for me as the one covers the main points.

I really like how everything was categorized and bullet pointed. I also really liked the fact that tips were given to prepare for the exam.

Great review! Very concise yet comprehensive, helpful to illustrate areas to focus attention on for studying.
