Customer Reviews

R. Tucker Abbott is a contributor to several Golden Field Guides.Herbert S. Zim contributed to nature guides from Golden Guides and St. Martin’s Press.George SandstromÃ Â contributed to nature guides from Golden Guides and St. Martin’s Press, including Rocks and Minerals.

Although the book is small but great book!

I expected good photos, not drawings I wouldn’t recommend this bookThe information you got you could get anywhereI thought it would be more like an Audubon Field Guide Book

Ive been collecting shells for years and never had a book.I kept buying doubles and didn’t realize it

until i got home from my travels.this book is compact enough you can take it along with you without any burden I check off the shells i already have.the illistrations are beautiful and descriptions precise

This great LITTLE book arrived in a short time and in perfect condition. It is just right to tuck into your beach bag to take shelling. It has so many pictures and lots of information on most any shell you might find on the beach. It is easy to use and understand; great for beginner shell seekers.

Surprisingly this small book but has very large variety of shells covered. Great for traveling.

If you like to collect seashells, then this handy key to the typical shells found on a beach may be of interest. It comes in a handy soft cover and is pocket sized, so it will easily fit in one's bathing suit's waist. It is slender, although several of the easy to find shells are listed, photos are reasonable and of good quality. It is similar to other such books, although not quite a book and not quite a pamphlet. It's in a league of its own!

This book was a disappointment as it does not have any photographs of shells as it shows on the cover, but rather drawings.

Great gift for my wife
