Synopsis

How long is a second? Can you count a minute? What is a decade? How many years are in a century?Me Counting Time can show you! From a second to a minute to an hour to a day Ã¢â ¬â • and all the way to a millennium Ã¢â ¬â • this playful introduction to time helps children understand the many measurements of time and how theyÃ¢â ¬â„¢re used in everyday life. Easy to read and easy to understand, Me Counting Time makes learning a fun time for every child.

Grade Level: Preschool - 2

Customer Reviews

Kindergarten-Grade 2-A little girl approaching her seventh birthday introduces children to the elements of time from seconds to minutes, hours, days, weeks, months, and years, using concrete examples from her life to illustrate the concepts. She can write an invitation to her party in a minute and it takes one hour to make a birthday cake. Brief discussions of a Viking ship, a photo of her great-great-grandpa, and her mother's wedding dress represent more abstract concepts such as millennium, century, and decade. Colorful, childlike drawings reinforce the explanations, and the back flyleaf presents a chart reviewing the concepts. A serviceable title.Joyce Rice, Limestone Creek Elementary School, Jupiter, FL Copyright 2000 Reed Business Information, Inc. --This text refers to an out of print or unavailable edition of this title.

Praise for Me on the Map:"Useful for teaching basic skills at the primary level."--School Library Journal"An admirable effort, and one kids will enjoy replicating."--Publishers Weekly"This simple picture book scores high in clarity."--Parenting --This text refers to an out of print or unavailable edition of this title.

The book was good for exposing kids to words that denote various measurements of time but it was long winded and boring. My son and daughter lost interest in the storyline.

Grand daughter loves this book. Easy to understand, I would say fun to read, lots of pictures with descriptive text. Would recommend for a 6-7 year old and up.

This is the second Joan Sweeny book I have bought from this "Me" series. I also have "Me On the Map." Both are great. I teach second grade and the kids love it. Both books work really well for extensions with cross curricular projects. I highly recommend!

The best book we've seen and used in telling time.

THis is the best book for learning how to count. We love it and get it out all the time. The illustrations are so well done and easy to read.

Bought this on behalf of a school district teacher. I have not heard anything negative, so I am assuming that it was a good purchase.

I love to incorporate reading into all subjects in my room. Great book to read to get the students interested and introduce some abstract ideas!

Great book, fast shipping and great price.
