Customer Reviews

We have been looking for these books for some time now. When we found them on here we were so excited. We are a homeschool family and my husband and I wanted our children to be able to experience these books like we have. Exactly like they use to be :)

Great bargain! I got these to use at the tutoring center I work at. I was looking for books that would encourage the kids to read but not be overwhelming. This set worked great!

Got this as a gift set for a child - friend who doesn't like to read so much.I remember these from when I was a child. My brother liked them because you can "choose a path to follow" every few pages. It makes kids feel like they're taking part in an ACTIVE adventure... almost like a game. As a result, kids are more willing to sit down with the book and attempt reading.As a teacher, I've recommended this to so many parents as a means to get children interested in reading. Since

reading motivation has a lot to do with confidence, books like this are a bonus because they're active, exciting and use very basic language. Any 4-6 grader should be able to pick these up and enjoy them.

I remembered the "Choose Your Own Adventures" fondly from my childhood, so for Christmas I bought the first set of books for my 5 1/2 yr old. While some of the text and concepts are still a little over his head occasionally, he really loves them. We work with him on reading and use the choices to encourage him to really think about what we have read as opposed to simply passive listening. The great part is... I don't remember the stories and I love getting to experience them again. Going to be buying the next set when I finish this review as we have read all of the first set of books pretty much through and through...I wish more of these types of books were written.Thanks!

Love that my boyfriends 7 year old daughter and 9 year old son had never heard of these- the boy loves to read them, the girl loves to have them read to her and be able to make the choices. An excellent choice to try to get this age group interested in books!!!

My grandson Loves these books. Choose your own adventures. These books when they came out my kids read them. They are very hard to find. They can change the adventures my going to certain pages for different outcomes to the stories. This has 6 books in the series and the price is great for what you get. A must read for all teens!

I bought these books for my son he says "they're interesting to read and I especially like mystery ones. What I like best is that there are bunch of different parts so like you can mix up one page and it still makes sense. I also like that there are tons of endings." I remember reading these books when I was a kid and thought he might like them too. He doesn't have the same love of reading his sisters and I do and I'm trying hard to cultivate that. So glad he likes them, will be purchasing additional sets in the future.

Loved these when i was a kid. So i bought this set for my girlfriends kid for christmas. They are exactly as i remember them. Any kid who enjoys reading should like these books especially since there is a feeling of having control over the story. And since each book has like 30-40 endings, its really like having more books than there are.
