Synopsis

With more a thousand species of birds occurring in Mexico and its neighbors, visitors to any area of Mexico will need a handy guide to the region's bird species. Birdwatchers will find examples of both temperate-zone and tropical species. Very few of these are ever found in the U.S. and only some cross the border. This practical field guide contains 140 full color illustrations as well as a handy map. The guide is laminated for durability and easily packed for travel.

Customer Reviews

Zoologist Jim Kavanagh has made a career out of introducing novices to plants, animals, the sciences and world cultures. In addition to creating over 500 simplified nature guides, he has also authored guides to languages, cities and outdoor skills. An avid traveler and backpacker, KavanaghÃ¢â ¬â„¢s path has taken him around the world to many remote destinations including the upper , Africa, Australia, and the Arctic Circle (and this is just the As). He is also the author of a series of state-specific guides to common species and natural attractions and a children's book on evolution.

Excellent hand held guide for birding around the Yucatan Peninsula area. It contained many of the

common birds and easy to carry with you. I was staying at a resort that had a variety of birds throughout the property but it isn't always easy to carry a bird guide with you around the beach. This pocket guide was easy to keep with me at the beach and because it is laminated, its perfect for the environment. I kept my guide book back in the room but kept this pamphlet with me during the day and it greatly helped me out discovering many new birds for my list. I would highly recommend this pocket guide.

If you are looking for a guidebook to stay on your bookshelf then this is for you. However if you are going to be out in the YucatÃƒÂ¡n looking for birds do not bring this guide. Keep shopping. My copy pretty much melted right away. Humidity resistance is a no brainer! While it is laminated it is not durable at all. Seriously it only lasted one day before starting to come apart! Get a roll of clear packing tape and cover the whole thing with it.

Nice little pocket guide to birds in the Yucatan.

Useful foldout reference. Most birds we saw were on this.
