This is the book my son will learn from and is the one required by his school. It's comprehensive and the deluxe version has two CD's which most kids will find more interesting than the book alone as they can play along.Although I ended up playing professionally, my son wants to learn like all the other kids so I mostly stay out of it and watch from the sidelines. I don't want to spook him off from his learning be being one of "those" parents.This book is so well done, I am confident taking a back seat to my son's entry into the world of music.

My son recently started Sax as a second instrument. He is familiar with the Clarinet version of this book so it was easy for him to make the transition since this book has a similar if not identical layout.

Exactly what my son needed

Good, Not intuitive for beginner, needs additional explanation by experienced player/teacher

If you have a child taking Intro to Saxophone, you'll be needing this book.It's a good one and is easy to follow.

As advertised
