Synopsis

Consistent practice is the best way for students to develop math skills and confidence, at any grade level. 180 Days of Math for Second graders provides workbook problems for each day of the school year, giving students ample time to use the skills they learn in class. Each problem is tied to a specific mathematical concept, allowing students to master skills and prepare for the next level of learning. Students will practice addition, subtraction, multiplication, and division, as well as tackling algebraic thinking, data analysis, logic problems, and more. With educational activities that are correlated to College and Career Readiness and other state standards, 180 Days of Math helps to prepare students for the future. The daily activities are great as homework or as additional reinforcement of math concepts outside of class. The 180 Days of Math workbook includes data-driven assessment tips and digital resources for parents and teachers, making diagnostics easy. Encourage your Second grade students to approach math with confidence, not fear, with daily practice! About Shell Education Rachelle Cracchiolo started the company with a friend and fellow teacher. Both were eager to share their ideas and passion for education with other classroom leaders. What began as a hobby, selling lesson plans to local stores, became a part-time job after a full day of teaching, and eventually blossomed into Teacher Created Materials. The story continued in 2004 with the launch of Shell Education and the introduction of professional resources and classroom application books designed to support Teacher Created Materials curriculum resources. Today, Teacher Created Materials and Shell Education are two of the most recognized names in educational publishing around the world.

Book Information

Series: 180 Days of Practice

Paperback: 208 pages

Publisher: Shell Education; 1 edition (April 1, 2011)

Language: English

ISBN-10: 1425808050

ISBN-13: 978-1425808051

Product Dimensions: 8.5 x 8.4 x 11 inches

Shipping Weight: 1.1 pounds (View shipping rates and policies)

Average Customer Review: 4.7 out of 5 stars 19 customer reviews

Each practice allows your students the opportunity to evaluate their understanding of a concept and celebrate their improvement success.

Holy moly- I love this! We switched to a standards-based report card and sometimes it’s hard to show clear evidence to parents.How to use:Every sheet is broken into 8 problems. Each of the 8 problems correlate to a different skill. Such as addition, subtraction, geometry, word problems, graphs, skip counting, etc. I also give my students the item analysis sheet (comes on the DVD). They are responsible for filling out their sheet with their correct and incorrect answers. Since you have an analysis that is correlated to a skill, you can quickly skim a child’s paper to see in which area they are missing a skill. It holds my students responsible and communicates clearly to the parents.The only draw back is that I bought this for my gifted students after seeing it featured in MindWare. I’m guessing I could have started later in the book but the first 20 or so pages are SUPER easy. However, you are supposed to start it day 1 of school. If you are teaching struggling math students, I’m sure this wouldn’t be a problem.

I love 180 days of math. We use this for our homeschool. My son is finishing up kindergarten and starting on 2nd grade level math. We also supplement with other things, but this is a great book. It also comes with a CD so you can print extra for your other kids.

I am never disappointed with the 180 days of ____ workbooks! Being a teacher, I am always looking for different materials to use to challenge my kids or give them just for practice/review. These are by far the best brand of workbooks you could find.

These are great for morning work or extra practice. I use them as independent practice for my students with special needs because I can have them work at their grade level and it since you can buy different levels, it is not obvious that they are working on something different than peers.

Great resource.

This series is superb! My seven year old twins are finding the daily reviews doable and I'm using them as a fabulous brush up on skills before third grade.

Perfect for 2nd grade

Great learning math book.
