Synopsis

How cool is a supersonic jet that can zip, dip, and zoom through the air? Or a helicopter that hovers as still as a hummingbird? In this 32-page beginning reader, a real-life pilot introduces kids to the greatest planes that ever flew. Enticing photographs and fascinating facts ensure that a childÃ¢â ¬â„¢s natural curiosity is both inspired AND satisfied. Like each book in this successful series, Planes offers a high-excitement topic from a trusted content provider.National Geographic supports K-12 educators with ELA Common Core Resources.VisitÃ Â www.natgeoed.org/commoncoreÃ Â for more information.

Grade Level: Preschool - 1

Customer Reviews

AMY SHIELDS lives in a little house in the middle of the woods in upstate New York. Ã Â She has an unusual friendship with her two dogs, Jenny and Toby, but the real loves of her life are her two daughters. Ã Â She has written and ghostwritten many books for children.

5 stars for seller and condition of the book. The layout and content of the book is disorganized. It seems to randomly jump from the cabin of the plain then to giant cargo planes. It's just not as good

as others like Polar Bears or Dinosaurs that actually flow and make a good read for the kiddo.....and adult!

Great intro to reading book with fun easy to read facts!

My daughter recently started reading and this is one of her favorite books to read to me during the bed time.

Completely disappointed when this came in the mail. All of the photos on every page are cut off in the middle in the binding!

I bought this for my nephew. He loves it. We have a fascination with planes..

I love the series. My son loves the books on trains and trucks. Planes focuses mostly on inside of passenger jets. My son doesn't like this book as much as others.

I ordered all these grade one books for my grandson in second grade as he is struggling with reading and I think these books will hold his interest and help him want to read.

Disappointing. Instead of talking about different planes, they show you the inside of a working cargo jet? Will be the last Nat Geo book we buy
