I cannot believe that this text (and I use that term loosely) is used to educate (and I use that term loosely as well). When you write information (again, term used loosely) regarding specific races/cultures that describe interaction with them in a similar manner that a dog training manual would describe interaction with a feral animal, you really need to check your prejudices. This text should be burned (and I love books and would never, ever advocate burning one but this one - it needs burning - all copies - and then it needs to go out of print).

This textbook is absolutely ridiculous and is currently the subject of a Twitter controversy because of some somewhat racially charged statements it makes about groups of people.

This is the worst book I've ever read about different cultures!! This author has clearly never been experienced with other cultures. To teach this to students is not just inappropriate but completely

false. It negatively stereotypes African Americans, Native Americans, and was inaccurate of Asian culture. Yet spoke only positive of European Americans.This book is GARBAGE

Came in like new. 100% satisfied

This book perpetuates dangerous stereotypes about several cultures. That it's being used to educate healthcare workers could lead to bias and improper or negligent medical care.Anyone who's been assigned this book as a part of their coursework should challenge their institution to finding a more objective source of the necessary material.

This book is offensive and should not be used to educate anyone on any level.

This book cast a wide stereotypical net upon many races, especially so called African Americans. The authors observations/statements on African American culture are extremely false and teaches the (non African American) reader absolutely nothing except racism and hatred, which is spewed from the pen of a misguided authors point of view.

If I could leave one star then I would. How dare you create a racist book that ignore systematic oppression! Furthermore, any school that uses this book should be shut down. This is garbage!
