Synopsis

WindHave you ever felt the wind tickle your face or heard it whistle through your window? Did you know that some wind travels faster than a car? Read inside to find out more about what causes wind, and learn how to make your own weather vane!Have you ever felt the wind tickle your face or heard it whistle through your window? Did you know that some wind travels faster than a car?Air is always moving. We can’t see air moving, though we can watch it push clouds across the sky, or shake the leaves of a tree. We call moving air the wind. In this enlarged edition, find out about the wind - what causes it, how it can be used to help us, and how it affects the weather.Arthur Dorros shows you how to make your own weather vane, and in simple terms, with playful illustrations, he explains just what makes the wind that blows all around us.

Customer Reviews

Arthur Dorros views being a writer like being a traveling detective. He finds ideas all around. He learned Spanish while living in Latin America, and many of his stories, such as Abuelo, grow from those experiences. Arthur is the author of many books for children, including Julio's Magic, a CLASP AmÃƒÂ©ricas Award Commended Title; PapÃƒÂ¡ and Me, a Pura BelprÃƒÂ© Honor Book;

and the popular Let's-Read-and-Find-Out Science book Ant Cities. He lives in Seattle, Washington.Arthur Dorros views being a writer like being a traveling detective. He finds ideas all around. My granddaughter really enjoys learning this way, and I like them too!

Great book. Good story. Grand-daughter loves it. The last page of her old book was missing so bought her another . So great for her to know how the story ends. Fully recommend this book so good for youngsters as they often want to try to read along with you!

Excellent product for the price

More of an educational book than for bedtime. Note that before you buy.

This is a wonderful addition to my classroom science books.

Questions about the wind have been big this spring in my house, and honestly, I couldn’t give my 4 year old an answer. This book supplies the answer. Now I can say, "It’s when hot air and cold air change places," and he’s happy. Great pictures. Great concepts. Talks about things they can relate to. It holds their attention very well.

I gave my 3year old grandson one book of this series; he loved it and saw others on the back cover and asked for more. It makes science available and understandable to the very young

ordered this for 3-4 preschool but i think its really for an older childthe content is good and i believe has nice experiments too
