Customer Reviews

Very good book on the subject of wine tasting. As someone who loves to try different types of wine this was a good read. The book covers the basics of wine tasting and how it involves the senses of sight, smell, and taste. I was a bit surprised to learn that an experienced wine taster can actually tell the age of a mine simply by its color and smell! My favorite part was the section that talked about the connection with food and wines and gives some great suggestions on what wines go with different kinds of food, such as see foods, beef and even casseroles. I would say this book is a good fit for anyone curious or interested in learning more about the subject.

If you want to know everything about tasting and assessing wine, pairing wine with food, or the differences in the varieties of grapes and wines, then this book is perfect for you. The author goes into complete detail of tasting and assessing wines, explaining how to look at, smell, and taste wine with an easy to follow assessment procedure. In my opinion, the most helpful information in this book is how to pair wine with food. I've always heard that a dish could be good or bad depending on the wine you have with the food. The author explains very well how to pair the right wine with your food and rules for choosing wine for your dinner menu. It's nice to finally know what order to serve wine (like white before read and dry before sweet) and I also never knew to make sure to use wine from the same country or region throughout the entire menu.

This short book takes you through the ins and outs of wine- how to taste it, pair it with food, the different types, and choosing it for a specific occasion. While we all know that wine is a must in Europe, it is slowly gaining its popularity in the US, and this book makes it a perfect fit for people who want to learn more.A short read, but text heavy (not much on bullet points here, I'm afraid), and would be better accompanied with photos, it is a good value for the price you paid for.

So being a wine connoisseur myself, I drink, read, compare and over all love wine. My favorite is Pinotage, for lots of reasons - a proudly South African cultivar that was created by Abraham Izak Perold in 1925. As the book describes all the different types of wines and what food pairing goes well with so elegantly, I have to say that Pinotage was truly missed. Regardless a very insight book

on wine and most things associated with it.

I love reading a range of boos and this is a topic that I am new to. There is alot to wine tasting and this book gives me a good idea for how to approach this school. Good value for the price.

If you don’t know much about wine, like me, this book is for you. Very detailed and full of relevant information. The Author knows the topic and he really did a great job.

You’ll learn a lot about Wine from this book. How to asses a Wine? Different types of Wine. Choose the right Wine for any occasion. Good read!
