Synopsis

In 1978 Hans Cousto, a Swiss mathematician and musicologist discovered the natural formula of the "Cosmic Octave" asÃ Â the link between different kinds of perodically occurring natural phenomena, such as the orbit of the planets, the weather,Ã Â colors, rhythms and tones. This extraordinary book explains theseÃ Â relationships with examples ofÃ Â astronomical data comparing the frequencies of planatery orbits, in architectural works, in ancient and modern measuring systems,Ã Â the human body, music and medicine.Ã Â Cousto reveals how music is truly the language of the cosmos and of the naturalÃ Â world.

This does not seem to be a complete translation of the original German text. I had hoped for more content. I will have to work through the original version with my Swiss friend or else learn to read German.

Very interesting indeed! An offering of perspective for anyone that has an interest in the music of the spheres, vibration, sound healing, and particularly the planetary healing forks and gongs. Good stuff!
