Obscenely overpriced for the limited information it contains. Consistently refers the reader to call insurance payers or visit websites (without listing urls) for more detailed information. Primarily Medicare focused despite the indication that other payers are covered. If you are completely ignorant about home health billing, this might help to organize your research, but if you know anything at all already, don't bother.

It costs $1 per page which is a pretty steep price however it has helped out my billing staff a lot since our purchase.
