Synopsis

Intended for the more concise course, Essential Invitation to Oceanography provides a thorough introduction to oceanographic concepts while omitting advanced topics that some courses do not require. Written for the non-science student, this text lets readers explore how the oceans work while explaining their relevance within the four major divisions of ocean science--geology, chemistry, physcis, and biology. A student-friendly writing style and rich pedagogy help students fully understand and retain the important concepts at hand, and feature boxes throughout engage them with the fascinating discoveries in oceanography. The comprehensive comapanion website, OceanLink, provides students with numerous learning tools and study aids, including chapter outlines,critical thinking questions, crosswords, practice quizzes, and much more. Instructor's material include: PowerPoint Lecture Outlines, PowerPoint Image Bank, Animations, and Test Bank.

Didnt really use this book for oceanography class but over all good book

Got exactly the book I needed with the online access. Arrival time was superb. Received just in time for start of class. I'm a very satisfied customer.

Pretty pictures, detailed explanations... makes me feel like I understand the oceans a lot better. I

like the author's voice, too... it has a hint of awe and a touch of wonderment.

The author did a great job in making this very understandable, even though the subject matter is extremely complex. He hits the key components of each chapter and highlights main areas of study, as well as offering good graphic representations. Excellent textbook.

Bought it for class, didn't read it much. The parts I did read were pretty interesting though. Quality book.

Brand new for cheap !

The book was sent and received before the expected time and it was in very good condition. The book itself does a good job of explaining how the ocean works, information about the Earth and it's oceans, and it gives the information not in a boring way.

As expected- saved A LOT over college prices!!!!! AND even though it was used and did not specify- It had the sealed online disc!!!!
