Synopsis

The pretty Britney was a shy non-nude diaper model from Central Europe. She worked being photographed in diapers for just two short years before moving on to other things. Her innocent face, along with her rather awkward posing, gave the shoots a fantastic amateur feel.This is the third in a series of photo books which cover the beginnings of on-line diaper girl model photography edited by Candy Sweet. Each book focusing on just one model, allowing the reader to enjoy their individual charms, whilst being reminded of a different era....one with chirping modems, dial-up Internet and each photo taking an age to download.It should be pointed out that these photos date from around the year 1998, when digital photography was very much in it's infancy. Some were shot on E6 film and then digitally scanned and others, though shot using the then new Leica Digilux 1.3 Mega-Pixles camera, it only allowed for the maximum size of 640 X 480 with a resolution of just 72 dpi. For this book, each photo has, as much as is possible, been bought up to date via retouching and color correction, with the dpi increased to 300 for modern printing.
