## Synopsis

This professional horticulture reference, which has been in print continuously since 1932, is fully revised and updated in this new edition. Based on real-life experiences from industry professionals including growers and equipment and greenhouse manufacturers, the presented information covers all aspects of greenhouse equipmentÃ¢â ¬â •the structures themselves, benches, irrigation, curtains, environmental controls, machination, and the greenhouse as a retail facility. The most recent developments in greenhouse evolution are discussed, as are the varieties of available greenhouse structures, from freestanding and gutter-connected greenhouses to shade houses and open-roof greenhouses. Information on the business side of managingÃ Â a greenhouse is provided, including how to market products and how to operate a retail store from a greenhouse.

## Customer Reviews

Chris Beytes is the editor of GrowerTalks magazineÃ Â and has been a professional horticulturalistÃ Â for nearlyÃ Â 30 years. He lives in South Elgin, Illinois.

For a beginnning student in horticulture this book is great for anyone interested in greenhouses and how they work. This gives loads of information on logistics of placement of the greenhouse, glazing material, form, heating/cooling and information that is really invaluable to the greenhouse manager. It is concise and well written, easily understood and informative. I have really only scratched the

surface of what is in this book. I value this as an important part of my library of horticulture literature. Buy here at .com and save at least 40percent off college bookstore prices.

Very useful for thinking through design quandaries of planning a new greenhouse range. As expected, the lighting chapter is not cutting edge current, but the rest, as is the lighting, a good overview of options, best practices and laying out automation possibilities. Useful for a quonset to multi acre range designs.

Clear and informative. Reliable publishers

Fabulous book, I have spent hours reading and learning about green houses. I really recommend this book for beginners in this topic.

Excellent

Just what the professor ordered

Ball Redbook is a greenhouse operators handbook. It is a great reference book.

Great item and made wonderful gift
