Synopsis

Do you have an old grapevine that needs training? A forsythia that has become too leggy? Evergreen shrubs that threaten to push through your first-floor windows? Have you just purchased a new home and feel mystified by the pruning chores ahead? If so, help is here in Pruning Trees, Shrubs & Vines.Pruning is one of the best things you can do for your plants and trees, if it’s done the right way. When pruned regularly and properly, your plants stay vibrantly healthy. Flowering shrubs and vines produce more blossoms, fruit trees and berry patches yield more fruit, and hedges and evergreens remain full and well-shaped.Pruning Trees, Shrubs & Vines offers all the advice you need to start pruning fruit and shade trees, evergreens, grape vines, berry bushes, ornamental shrubs and vines, hedges, and roses like a professional. You’ll learn how, where, and when to prune as well as what tools to use. For quick reference you’ll find a pruning timetable, a condensed plant-by-plant pruning guide, and an A-to-Z glossary of pruning terms.

For quick reference you'll find a pruning timetable, a condensed plant-by-plant pruning guide, and an A-to-Z glossary of pruning terms.

Great Book on the topic of pruning, easy read, good illustrations ... My only wish is that they listed more types of trees /plants in the pruning table, but I have to say I am very happy with the book

This is a nice short concise reference guide which is exactly what I wanted. For those who want more detail/more fluff then maybe an actual book would be better for you. It's basically a pamphlet which is why some others are giving lower star reviews. Pamphlets come packed full of good information sometimes, especially when they are Storey's.

GDP bk

Bought this book in anticipation of the upcoming season this next year. Have about 6 acres of fruit trees in orchard, and they havent been properly pruned in God only knows how long. Looking for info to prune so the trees will produce bigger and better fruit. Havent gotten the opportunity to put read words into live physical action, but from what I've read, it looks like it all makes sense.

Very superficial explanation of pruning. Google search will teach you more than this book.

Clear and Concise.....informative!

Great advice for the novice plant lover.

Bought for Friend , he likes it
