Helen Baird is a fine arts graduate who makes various styles of mosaics for numerous clients including Liberty in London, as well as selling work privately. She is also a successful freelance artist and illustrator.

Many new and innovative ideas using glass, tiles, broken dishes, and other items. There are numerous step-by-step directions. I am anxious to try a bowl for a fountain.

I want to make them all but thought I will start with the house numbers and then try the birdbath. This is the perfect book for what I was looking for. Not only for myself but also as gifts. Very clear instructions and pictures are beautiful.

A beautiful book with lots of projects suitable for the beginner as well as the advanced crafts person. Beautiful color photos of all projects.

I find that I like to read through the whole book and then plan a project. I found several in this book - now all I need is time!

Beautiful book, fast delivery, but what I needed was one that explains what sealers to use for waterproofing and even though it mention a couple it doesn't explain step by step how to apply it. I guess I need one for beginners, wish I could find the information and steps I need. I have been searching on the Internet for several days.

My opinion is this book is for someone who has taken a class and has an idea of what is needed. This is a book utilizing more thick tiles or shells. Not a beginner book for simple ideas. This is a go to book but not first time projects.

I love this book, and cannot wait to put those ideas to good use. I have made some cement casting pieces, and some mosaics, and have always wondered how to make my own sculptures for my garden. This author gives a lot of information, and has projects ranging from the small to the very large, and in between. Great book.
