Michael Taillard, PhD, MBA, owns and operates OPII Schools, an award-winning national private school and tutoring company designed as a philanthropic experiment in macroeconomic cash flows as a form of urban renewal.

I was expecting this book to explain things in details but I found it giving you overall of everything where you need to google to have more details on almost every chapter. In my opinion, investpedia is far better than this book.

This information will be extremely helpful for a business owner without a deep background in corporate finance. Also a great knowledge source for the individual investor.

Good

Arrived quickly and helped me get through the remainder of my course. Wish there were more explanations to the equations for PV and FV in it though

Good read and easy to follow.

Awesome! A must buy...

The book was easy to understand and explained the world of corporate finance in a clear simple way. Great for the beginner needing corporate finance to be explained simply.

Used for college Finance class and it helped a great deal.
