Grade Level: Preschool - 1

Customer Reviews

Lola M. Schaefer is a Compass Point Books Author

This book presented a simple, direct explanation of deafness. I work with elementary age deaf kids who sign and have cochlear implants, and they loved reading this. The text had a few "hard" words but was within their grasp with a little help.They enjoyed looking at the picture of deaf kids with hearing aids and cochlear implants--"Just like me!" And they enjoyed looking at kids signing and going to speech.This book has a neutral tone. Saying that some deaf kids talk, but not that it is better to talk. Saying that some deaf kids sign, but not that it is better to sign. The book conveyed "This is how it is," more fact than opinion. Exactly what I was looking for.

It is a nice easy introductory book that can help spark good conversation with children about deaf/ hard of hearing friends. Written in a way that is easy for young children to understand but doesn't speak down to older students.

Another great book to have in our classroom library. The book has colored pages with accompanying text. This book is great for preschool to primary level.

I read this with my severly visually impaired student. He didn't realize that the term blind applied to him. He is new to English. Still he enjoyed the book and had lots of questions, which is what I wanted.

Purchased for my daycare, book has nice pictures and was easy to understand. It had addition information in the back for resources and definitions for some of the words used that are unfamiliar. This book is part of a set of five, I recommend buying all of the set.

Nice pictures, but won't last long in my busy preschool classroom. It's a tiny paperback book!

Content was okay but book size is very small.

Great book to share appreciation for differences in children!
