ISBN-13: 978-0078297496

Product Dimensions: 8.3 x 1.3 x 10.3 inches

Shipping Weight: 2.3 pounds (View shipping rates and policies)

Average Customer Review: 3.5 out of 5 stars 3 customer reviews

Best Sellers Rank: #347,836 in Books (See Top 100 in Books) #79 inÃ Â Books > Teens > Education & Reference > Science & Technology > Biology #87106 inÃ Â Books > Textbooks

Customer Reviews

McGraw-Hill authors represent the leading experts in their fields and are dedicated to improving the lives, careers, and interests of readers worldwide

Arrived in adequate condition, (as i had expected) in a timely manner. Thank you! It’s wonderful to get such expensive books at such discounted prices.

This seller is really excellent. they delivered as they claimed they will do (I mean, on time).

This is a decent text for high school students with low reading levels. However, it must be supplemented. The text makes a good framework as long as one supplements with outside activities, vocabulary, etc.A major downfall to the text is lack of vocabulary. For example, in cell biology, the text relies on descriptions of the parts of cell instead of standard vocabulary. High school students need to know what the endoplasmic reticulum is, not just that it is a "network of canals".Another downfall is that the authors have ignored the fact that organisms are divided into 6 kingdoms, not 5. The kingdom Monera was divided into Archebacteria and Eubacteria decades ago

and high school students need to know that!
