Synopsis

The international community invests billions annually in thousands of projects designed to overcome poverty, stop violence, spread human rights, fight terrorism and combat global warming. The hope is that these separate projects will 'add up' to lasting societal change in places like Afghanistan. In reality, these initiatives are not adding up to sustainable peace. Making Peace Last offers ways of improving the productivity of peacebuilding. This book defines the theory, analysis and practice needed to create peacebuilding approaches that are as dynamic and adaptive as the societies they are trying to affect. The book is based on a combination of field experience and research into peacebuilding and conflict resolution. This book can also be used as a textbook in courses on peace-building, security and development. Making Peace Last is a comprehensive approach to finding sustainable solutions to the world's most pressing social problems.

Customer Reviews

Dr. Ricigliano does an excellent job of explaining conflict. His perspective is a terrific blend of real world practice with academic research. His approach helps to provide practitioners with an understanding of conflict, and how best to achieve lasting peace. His systems approach to conflict is thought provoking, and enables a systematic approach to examining the problem. I recommend this for anybody who is a peace professional - government, NGOs, IGOs, etc.

this is a great book about peace building and conflict resolution. Recommended for both students and professors in the field alike.
