PM is one of my favorite authors. He has a good mind and a good heart. Loved his "Healing Made Simple." Liked this book a lot, but would have like some more practical instructions for how to walk in the spirit/kingdom during an economic collapse. However, this is an excellent primer for those needing to understand the basics of the cause of economic collapse and definitely presents some inspiring Kingdom possibilities to open your heart to and pray into as to how to conduct yourself, as a citizen of the Kingdom of Heaven, during a financial crisis. I think the price is right for a Kindle book and is worth the time to read and perhaps share with people you know who are are starry eyed and can’t imagine AMERICA ever returning to a great depression . . . I personally think it is a serious possibility, but don’t want to scare the naive. I want to soft sell it, so to speak, and I think PM has done a great job of doing that. I also want people to consider their supernatural resources, and PM stretches you nicely in this area. Overall, I’d say "well done."If you are well versed on the subject of our current state of financial instability, you would probably find this too rudimentary. If you have friends who need to know the truth and you don’t want to scare the life out of them, or overwhelm them with too much info, this is an excellent place to send them.Personally, I’d like to see more practical advice on how to maneuver a collapse via Kingdom principles & POWER.

In this great little book, Praying Medic gives a clear and simple (though not simplistic) overview of how the basics of our economy works and what the causes are of economic crisis. Using very simple tools, like looking at national debt-to-GDP ratio’s of countries, he outlines which countries currently are in the dangerzone for hyperinflation. It will certainly make you listen to economic news in a grander context.Although the situation of the countries may alter over time, the book certainly gives you something to think about concerning the fragility of our economy. With an emotion-driven stock market and our complete dependency on fiat currencies we are all in a situation that, once it collapses, will affect everyone of us.However, this is not a book about end-time catastrophy etc. It rather gives some thoughts on the role the church can play during times of crisis. It also shares some of the dreams the writer had, that he considers as prophetic in nature and gives some possible explanations.Recommended to anyone interested having some insights in a system that we all take part in.

This book gives a simple and concise overview of economics and helps the average person understand the complexities of our financial global economy. The faith which he challenges the reader to pursue is awesome! His ultimate conclusion to preparing for and overcoming potential future financial crisis is simple and yet profound. Who is our provider and where does our provision come from? This is what we need to be focusing on and preparing for in the days ahead. Well done Praying Medic! Fix your eyes on the author and perfector of all things!

This was a well researched book from an unusual source. It is not flawed due to exagerattions or deletion of pertinent information. It addresses the seriousness of the hour with hope and strategy. Truth is revealed with clear analysis and substance. I highly recommend to anyone, even those who have no interest in economics

In this author's style, which is fluff-less and down-to-earth, he combines some historical lessons about economic collapses along with revelation from the Holy Spirit through dreams, etc, regarding what's coming down the pike. You won't read this and want to find a rock to crawl under, you'll go away excited and armed with some practical things help prepare, along with encouragement to keep expanding the Kingdom. I had just read "Resurrection of the USA: A word of hope" by Pastor Joseph Sweet (I think you can get a free download of that, actually) and could tell both are hearing from the same Holy Spirit. HIGHLY recommend both of these books for sounding a clear message with 0 fear attached.

Hmmm, Makes you think how much our nation has turned away from our precious Lord. Now we all have to pay for the stupid mistakes our nation has made. Great book I learned a lot. I have been praying for about a year now for our nation seems to have only gotten worse, but God has been so gracious in helping me prepare for this crash I also think it's coming, read Jonathan Cahns book it will tell u a lot. Wake up people and pray earnestly for God to turn our Nation around and back to Him.

I appreciate the information on formation the author provided and the way it was presented. I agree the coming times will present opportunities for the Kingdom of God. Question is will we be willing to accept the opportunity?

All I can say is wow. I learned so much about economics. The spiritual things he writes about is mind blowing. I believe that every Christian should read this and be encouraged and not fearful.
