As a college student and always writing papers when I have a meltdown because I cannot remember exactly how APA goes. Especially, since some changes have been made. This chart has helped me many times.ÃƒÂ¢Ã â ¬Ã â

Ok chart. Don’t like that MLA and APA formats are on the same chart. Gets really confusing. I wish they had completely separate charts. I ended up throwing mine away because I got sick of trying to remember what was on which page.

I didn’t refer to it at all. I thought it would be helpful but I literally only glanced at it when I began writing a paper and realized it wasn’t overly useful. The print is also small and the box styles used to differentiate topics are more visual clutter than I could navigate easily. I wouldn’t recommend.

EXCELLENT BOOK.

Worthless. I always fall for these things and they are never offer anything good. You would think they would offer common formats of references but it instead goes into minute detail about God knows what. Just use purdue owl.

This Apa/Mla Guidelines is very helpful in the way that you can put it in your notebook notes and look at it anytime and thin. fast reference if you don’t like to carry a lot of books

This is perfect for someone who struggles with certain aspects of MLA or APA writing style. It has pre-punched holes so it fits perfectly into a binder for organization. I had always used MLA throughout high school and most of college. I struggled with the works cited page and in text citations so this really helped me out a lot. I also finally took a class that required APA format and I had no idea what I was doing, but luckily I had this to help me out. It is laminated and the paper is very thick so it is very sturdy and should be able to withstand any heavy usage. I suggest this product to anyone. It was cheap and exceedingly helpful!

My college courses require a lot of writing and a whole lot of citation. I keep this beside my desk for quick reference. It is more durable and accessible than printed forms or books, and it has never failed me.
