Customer Reviews

Contains the answer to pretty much every Neurology pimp question I’ve ever been asked on them. :)

these things are super great. Very quick reference for the basic things that you can’t remember [but should] when it comes to your Neurology rotation. Carry ’em in the bag with my other pocket handbooks for quick reference. Definitely would recommend

Handy for those of us who are Intensivsts

Great for quick reference in your rotations. They have very useful information.The material they are made of is plastic, and durable in comparison of other pocket card set.I strongly recommend it.

Helpful

These are compact, handy reference cards that fit perfectly in my white coat. Has been great helping me review on the spot during the first week of my rotation, and I plan on keeping them on me at all times for the rest of my rotation!

great information but hard to read/ use. I haven't tried to break the fastner. They would be better if I could. Makes it difficult to read the information and the print is really small. At 50, my eyesight is changing....

If you aren't a neurologist, but a med student or interested health professional, this is a good way to keep different criteria and other things at your side. There's nothing in there that you can't look up on your phone, but sometimes it's quicker to just have a card set.
